BACKGROUND OF THE INVENTION

Page 2, Line 7, insert the following headings and paragraphs:

SUMMARY OF THE INVENTION

The present invention relates to a process for control of a motor vehicle and trailer unit with the electronic systems of the motor vehicle.

The present invention contemplates a process for the operation of a vehicle unit that consists of a motor vehicle to which a trailer is coupled with the motor vehicle being equipped with a plurality of electronic systems for controlling and/or regulating operating conditions of the vehicle unit. The electronic systems include an electronic braking system (EBS), an electronic engine output control system (EMS), an electronic drive-train control system (ASS) and an electronic steering control system (ELS) with the operating conditions achieved by the vehicle unit and/or desired by the driver being automatically controlled and/or regulated through the co-operation of the electronic braking system (EBS), and/or the electronic engine output control system (EMS), and/or the electronic drive-train control

system (ASS) and/or the electronic steering system (ELS).

The invention also contemplates the electronic systems described immediately that are connected by an electronic communication system and that the processes are integrated into the electronic systems by hardware and/or software.

Various objects and advantages of this invention will become apparent to those skilled in the art from the following detailed description of the preferred embodiment, when read in light of the accompanying drawings.

BRIEF DESCRIPTION OF THE DRAWING

The sole figure is a block diagram illustrating the maneuverability assist system.

DETAILED DESCRIPTION OF THE INVENTION

Page 10, Line 23, insert the following paragraphs:

Although embodiments of the present invention have been illustrated in the accompanying drawing and described in the forgoing detailed description, it will be understood that the invention is not limited to the embodiment disclosed, but is capable of numerous rearrangements, modifications and substitutions without departing from the spirit of the invention as set forth and defined by the following claims.
